

WON Publication for Week 41 will be Thursday 31 Dec 2020
Data Freeze for PPS will be 2300hrs evening before

Requestor: User New

Search Criteria:	Route Group	GW Cardiff DU Work
	From Date/Time	0001 Sat 09/01/21
	To Date/Time	2359 Fri 15/01/21
	Library	'N'
	Status	NOT Cancelled

This is the last time we will be discussing week 41 therefore please ensure all details are correct.

IME authorised change requests required for all amendments to this week.

Sort Criteria: Week Number/Line of Route Code/Start Date/End Date/Location(route order)/Start Time/End Time

Show:

- Standard
- Possession Additional Information
- Worksite Additional Information
- Repeating Item as a Reference
- Worksite Requester

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.
