WEEKLY OPERATING NOTICE

Containing

SAFETY NOTICES
TEMPORARY SPEED RESTRICTIONS
ENGINEERING ARRANGEMENTS
SIGNALLING AND PERMANENT WAY ALTERATIONS
(NEW ITEMS)
(DETAILS OF WORK ALREADY CARRIED OUT)
GENERAL INSTRUCTIONS AND NOTICES
(AMENDMENTS TO OPERATING PUBLICATIONS)
(MISCELLANEOUS INSTRUCTIONS)

SATURDAY 16 JANUARY 2021
to
FRIDAY 22 JANUARY 2021

**THIS NOTICE COVERS ALL LINES SHOWN IN THE
SCOTLAND ROUTE SECTIONAL APPENDIX**

If the weekly supply of this notice is not received at the normal time, application must be made to your local Manager

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

SCOTLAND ROUTE SAFETY NOTICES

NO ITEMS

SECTION A - TEMPORARY SPEED RESTRICTIONS

(Until further notice unless otherwise specified)

Warning Boards and Indicators provided unless otherwise shown.

† Indicates that the Warning Boards and Indicators will be moved as the work progresses. Where two speeds are shown for a restriction e.g. 20 the Rule Book Module SP, Section 4.3, (differential speed restrictions) applies.

SECTION A - TEMPORARY SPEED RESTRICTIONS

Item No.	Location	Lines Affected	Mileage at or between	Restriction	Remarks
----------	----------	----------------	-----------------------	-------------	---------

SC123 BATHGATE TO HELENSBURGH (VIA SINGER)

T2019/ 148621	Charing Cross (Glasgow) and Finnieston East Jn	-	Up Airdrie 1m	1320yds 1m 1100yds	20mph Track - Other (20/47) IMDM Glasgow
------------------	--	---	---------------	--------------------	--

SC125 HYNDLAND EAST JN TO DALMUIR (VIA YOKER)

T2020/ 159404	Garscadden and Yoker	Down	-	1m	1540yds 2m 0yds	50mph Track - Other (20/29) IMDM Glasgow
------------------	-------------------------	------	---	----	-----------------	--

Due to condition of track

T2020/ 157730	Clydebank and Dalmuir	-	Up	4m	600yds 4m 400yds	20mph Track - Other (20/25) IMDM Glasgow
------------------	--------------------------	---	----	----	------------------	--

To issue TSR of 20mph on the up line between Clydebank to Dalmuir from 4.0400 to 4.0600, normal linespeed is 60mphh. This will be in place until further notice due to condition of track.

Conversion to TSR reduces risk of performance incident relating to speed restriction equipment.

IRONSHILL AND LUNAN BAY VIADUCT

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

DETAILS OF WORK ALREADY CARRIED OUT (SC)**SC031 GRETNA JN TO GLASGOW CENTRAL (VIA KILMARNOCK)****ANNAN STATION, PLATFORM 2 AT 107m 480ch, ELR – GSW****UNTIL 0600 HOURS ON SUNDAY 07 FEBRUARY 2021**

76 yards (70 metres) of Platform 2 is out of use (OOU) from the South end of the platform between 107 miles 480 yards and 107 miles 404 yards to facilitate the construction of a new platform.

The 2/4 Car stop markers will move to 2 meters from top of ramp (TOR) north end of platform 2.

(C/5668 - C11059) (11/01/21) (44)

SC107 EDINBURGH WAVERLEY TO GLASGOW QUEEN STREET (VIA FALKIRK HIGH)**** GREENHILL AREA**

The SDA/SANOS Project has undertaken signalling works in the Greenhill area.

This work involved:

- Commissioning of indication only axle counters in the Down Goods Loop at Greenhill Upper.
- Existing Down Branch Goods Loop on the Greenhill branch is upgraded to a passenger loop and renamed as the Down Greenhill Branch Loop.
- Installation of speed board at 0m 39ch (853yds) on the down Greenhill Branch facing in the down direction for the previously unsigned 15mph PSR into the Down Greenhill Branch Loop.
- The position light signal on Signal GJ432 at 107m 18ch (398yds) on the Down Greenhill Branch facing in the Up direction will be removed. The position 1 junction indicator (already installed) will be commissioned to give a main class route into the Down Greenhill Branch Loop.

(C/5664 - C11060) (27/12/20) (42)

CADDER (WEST END) TO CADDER (EAST END)

As part of the Cadder East & West S&C Renewals project the following changes have been made:

The Up direction turnout speed for routes from the Up Main to the Up Passenger Loop at 4m 45ch has changed from 30 to 40mph. There is a new Up direction 30 mph commencement speed board in the Up Passenger Loop at 5m 20ch mounted on CG214 Signal. The existing Up direction 30mph speed board with Right Arrow in the Up Passenger Loop at 5m 35ch has been removed. 711A points in the Down Passenger Loop has been renewed and repositioned 46m towards Bishopbriggs. 711B trap points in the Down Arrival has also been renewed and repositioned 72 metres towards Bishopbriggs.

The Down direction turnout speed for routes from the Down Passenger Loop to the Down Arrival at 5m 31ch has been changed from 15mph to 25mph and repositioned to 5m 29ch in conjunction with the movement of 711A Points. CG506 Ground Position Lit Signal in the Down Arrival has been elevated to a height of 2 metres and repositioned 84 metres towards Bishopbriggs to 5m 22ch in conjunction with 711B Points movement. CG508 Signal in the Down Arrival/ Departure at 4m 76ch has been elevated to a height of 2 metres in its existing position. CE513 Signal in the Down Arrival/ Departure at 4m 58ch has been elevated to a height of 2 metres in its existing position. The Down direction Notice Board (Down Arrival) at 4m 76ch has been renamed Cadder East Stop Board and the Up direction Notice Board (Down Departure) at 4m 62ch has been renamed Cadder West Stop Board.

Your attention is drawn to the associated Table A in Section D of this document.

(C/5650 - C11036) (02/01/20) (43)

SC109 POLMONT JN TO GREENHILL UPPER JN (VIA FALKIRK GRAHAMSTON)**** GREENHILL AREA**

The SDA/SANOS Project has undertaken signalling works in the Greenhill area.

This work involved:

- Commissioning of indication only axle counters in the Down Goods Loop at Greenhill Upper.
- Existing Down Branch Goods Loop on the Greenhill branch is upgraded to a passenger loop and renamed as the Down Greenhill Branch Loop.
- Installation of speed board at 0m 39ch (853yds) on the down Greenhill Branch facing in the down direction for the previously unsigned 15mph PSR into the Down Greenhill Branch Loop.

(C/5664 - C11060) (27/12/20) (42)

CORNTON MCB-OD UPGRADE

Controlled 3 aspect signal SN47 situated at 118m 1342yards (61 chains) on the Up Main has had its existing position 1 junction indicator replaced with a position 1 and position 2 junction indicator and a new offset position light signal has been installed.

The new position 2 junction indicator and offset position light signal are bagged out of use until future commissioning date.

(C11097) (02/01/21) (43)

**** CORNTON MCB OD UPGRADE**

A new signal structure has been erected on the up main at 119m 537yds (24 chains). The signal has been hooded with a black bag displaying a white cross until it is commissioned.

(C11070) (26/12/2020) (42)

SC133 WESTERTON JUNCTION TO MILNGAVIE

**** MILNGAVIE PLATFORM EXTENSION PROJECT**

Platform 1 at Milngavie Station is extended to 206 metres and brought into operational use. Platform 2 at Milngavie Station is extended to 207 metres and brought into operational use.

The position of the existing TRTS units has been altered and 2 new TRTS units have been installed on each platform. The new positions are shown below:-

Platform 1		
Signal	TRTS Unit	Distance from Buffer (m)
YH410	1	18
YH410	2	75
YH410	3	143
YH410	4	203
Platform 2		
Signal	TRTS Unit	Distance from Buffer (m)
YH408	1	18
YH408	2	75
YH408	3	143
YH408	4	203

The new signal post telephone for YH410 signal positioned at the end of Platform 1 is brought into operational use.

The new signal post telephone for YH408 signal positioned at the end of Platform 2 is brought into operational use.

(C11068) (26/12/2020) (42)

SC195 ABERDEEN TO INVERNESS

LAMINGTON FARM LC (UWC) AT 25m 57ch, ELR – ANI1

Lamington Farm UWC - User Worked Crossing with a Telephone, 25 miles 57 chains has been upgraded to a R/G - Red and Green Crossing by the installation of VaMos

Your attention is drawn to the Table A published in Section D of this notice.

(C/5670 - C11066) (15/01/21) (44)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS (SC)**RULE BOOK AMENDMENTS****RULE BOOK AMENDMENTS FROM 00:01 HOURS ON SATURDAY 05 DECEMBER 2020****New section for inclusion in GERT8000 – TS1****13.2 COSS, IWA, PC or SWL blocking a line****13.2.2 Agreeing the Arrangements**

You must agree with the COSS, IWA, PC or SWL:

- the line to be blocked
- the nature of the work
- the locations between which the work will take place
- the amount of time needed to do the work
- the time after which permission can be given for the line blockage to start
- which signals or block markers will protect the activity, including those in both directions on a single or bi-directional line
- any additional protection needed if the work will affect the safety of the line
- the arrangements if single line working is taking place
- the arrangements at any level crossings affected by the line blockage.

If the location of the work will be beyond any points or crossover, you may set the route for an unaffected line as long as you have agreed this with the COSS, IWA, PC or SWL. See [diagram TS1.2](#) on page 45 and [diagram TS1.3](#) on page 46.

If the site of the work will be less than 200 metres from the protecting signal or block marker, and the work will affect the safety of the line, the COSS, IWA, PC or SWL will tell you and you must also keep the previous signal at danger or the route closed at the previous block marker unless the route can be set for an unaffected line. See diagram TS1.4 on page 47 and diagram TS1.5 on page 48.

If this signal or block marker is controlled by another signaller, you must get confirmation from that signaller that this has been done.

If you have told the COSS, IWA, PC or SWL, you can allow the signal to be passed at danger or the EoA to be passed without an MA so that a train can reach a:

- station
- siding
- crossover being used for single line working.

See diagram TS1.6 on page 49 and diagram TS1.7 on page 50.

route closed at the previous block marker unless the route can be set for an unaffected line. See diagram TS1.4 on page 47 and diagram TS1.5 on page 48.

If this signal or block marker is controlled by another signaller, you must get confirmation from that signaller that this has been done.

If you have told the COSS, IWA, PC or SWL, you can allow the signal to be passed at danger or the EoA to be passed without an MA so that a train can reach a:

- station
- siding
- crossover being used for single line working.

See diagram TS1.6 on page 49 and diagram TS1.7 on page 50.

If the work will affect the operation of any level crossing, you must carry out the regulations in module TS9 Level crossings - signallers' regulations.

If any crossing keepers will be affected by the protection arrangements or the work, you must tell them.

MISCELLANEOUS INSTRUCTIONS – Continued**DISRUPTION TO GSM-R COVERAGE****SC107 EDINBURGH WAVERLY TO GLASGOW QUEEN STREET (VIA FALKIRK HIGH)**

GLASGOW QUEEN STREET TUNNEL NORTH
FROM 0001 HOURS ON SATURDAY 5 DECEMBER 2020
UNTIL 2350 HOURS ON SATURDAY 6 JUNE 2021

The following area around Glasgow Queen Street Tunnel North, ELR=EGM1 0m 60ch / LOR=SC107 has encountered a reduction in radio coverage with the GSM-R system which may result in registration problems and hinder the ability of the driver to contact the signaller. This will be presented to the Driver on the DCP as 'Searching for network'. The radio should recover when the train has moved out of the affected area. Mitigation Measures are in process with an estimated completion August 2021.

PUBLICATION MANAGER

IMPORTANT GUIDELINES FOR SUBMITTING SAFETY, 'C' OR 'D' ITEMS

All submissions must be made using Section C and/or D electronic forms from this link www.railnotices.net. All submissions must be made 19 days before the start date.

If items are received for inclusion in specific WONs after the 'submitted by' date they will be deemed to have missed the publication deadline for the WON they were submitted for. It is the responsibility of the 'proposer' to ensure that all required information is provided with the submission. Network Rail's Publications Manager reserves the right to refuse any late, inaccurate or incomplete submission.

Any queries relating to submissions or you require a copy of the Submission Guidelines please e-mail PlanningPublications@networkrail.co.uk.

This Publication is produced by:

Planning Publications at Network Rail, The Quadrant:MK,
Elder Gate, Milton Keynes, MK9 1EN

Email: PlanningPublications@networkrail.co.uk.

***** ATTENTION *****

Would you like to receive this publication electronically via e-mail instead of a printed copy, receive it earlier and become friendlier to the environment?

Are there any Sections that you do not require and can be omitted from this Bespoke WON?

Do you receive additional printed copies that are not required?

If your answer to any of the above questions is YES, please contact us at PlanningPublications@networkrail.co.uk with the details.

Printer Details

This publication is supplied by Office Depot. If this publication is not received by 1500 hours Thursday (or if you have any printing or distribution issues), please contact The Office Depot Helpdesk (8am-6pm) 020 8269 3735 or email: NRPublications.helpdesk@officedepot.eu.

Out of hours (6pm-8am) 01793 432 913.

An electronic copy is a more efficient and speedier way to receive any publication and especially during adverse weather condition when this may be the only option to receive it.

Section C&D and Safety Notices

For queries regarding the content of sections C&D and Safety Notices of this publication contact Planning Publications Team at: PlanningPublications@networkrail.co.uk.

Electronic Storage for Network Rail Users Only

Electronic Copies of all WON's are available from our shared drive <V:\MK\NC1FG03-GGroups\Planning Publications\Publications>
