WEEKLY OPERATING NOTICE

Containing

SAFETY NOTICES
TEMPORARY SPEED RESTRICTIONS
ENGINEERING ARRANGEMENTS
SIGNALLING AND PERMANENT WAY ALTERATIONS
(NEW ITEMS)
(DETAILS OF WORK ALREADY CARRIED OUT)
GENERAL INSTRUCTIONS AND NOTICES
(AMENDMENTS TO OPERATING PUBLICATIONS)
(MISCELLANEOUS INSTRUCTIONS)

SATURDAY 02 JANUARY 2021
to
FRIDAY 08 JANUARY 2021

**THIS NOTICE COVERS ALL LINES SHOWN IN THE
WESTERN AND WALES ROUTE SECTIONAL
APPENDIX**

If the weekly supply of this notice is not received at the normal time, application must be made to your local Manager

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

WESTERN & WALES ROUTE SAFETY NOTICES

CHRISTMAS PUBLICATION DATES

Please note, the dates for publication of the WON's and WON Supplements over the Christmas period are as follows:

WEEK	WON	WEEK	WON Supplement
		38	Thursday 17 December 2020
39	Thursday 17 December 2020	39	Wednesday 23 December 2020
40	Friday 18 December 2020	40	Wednesday 30 December 2020
41	Thursday 31 December 2020	41	Thursday 07 January 2021

FREEZE INFORMATION:

WK38 Supplement will be at 22:30 hours on 16/12/2020

The PPS freeze for the WON will be 2300 Hours, the evening before publication.

The PPS freeze for all other WON Supplements will be 1000 Hours on the day of publication.

(SN1207) (21/11/20) (41)

SECTION A - TEMPORARY SPEED RESTRICTIONS

(Until further notice unless otherwise specified)

Warning Boards and Indicators provided unless otherwise shown.

† Indicates that the Warning Boards and Indicators will be moved as the work progresses. Where two speeds are shown for a restriction e.g. 20 the Rule Book Module SP, Section 4.3, (differential speed restrictions) applies.

SECTION B - ENGINEERING ARRANGEMENTS.

At or Between	Lines Affected	Remarks
---------------	----------------	---------

Normally, signals are used to mark possession protection limits. Where points have to be used, this will be signified by the suffix "pts".

Detonator protection for possessions arranged under Rule Book Module T3 must normally be placed at 400 metres beyond the protecting signal (or points or through crossings beyond the protecting signal) at the start of the possession and 400 metres on the approach to the signal (or points or through crossings) at the exit from the possession. Where this distance cannot be obtained, the detonator protection must be placed at the greatest distance possible from the signal (or points or through crossings) concerned.

Where detonator protection has to be placed at less than the required 400 metres beyond the possession protecting signal (or points or through crossings) at the start of the possession or protection has to be placed at less than the required 400 metres on the approach to the signal (or points or through crossings) beyond the possession, then this will be indicated by a # symbol following the signal or points number quoted in the PROTECTION LIMITS.

TRAFFIC REMARKS

Down services to have an additional 3 minutes added [3]

GENERAL REMARKS

DUE TO THE DEGRADED CONDITION OF THE CABLES AT SWINDON ROAD LC IT HAS BEEN NECESSARY TO APPLY A RESTRICTION OF USE ON THE SECTION OF TRACK OVER THE LEVEL CROSSING ON BOTH THE UP AND DOWN MAINS

Limits of Affected Area

Due to the increasing rate of degradation in the REB in the past 6 to 8 weeks, the following actions have been taken.

Down

GA102 restricted to display a Max of Y

Block section required for headway G36 to G104+overlap

UP

GA103 restricted to Y gives GA101 to UM83+overlap(UM83/4)

*Ops will be regulating through the sections to ensure the headway is maintained.

This is to ensure we do not end up with 1 in the back of another.

The Auto Raise function of the crossing has been disconnected and the CCTV camera is now always on, this is to ensure that the crossing cannot raise before a train has passed through and also puts the onus on the crossing keeper to monitor the crossing for all trains.

SECTION C – SIGNALLING AND PERMANENT WAY ALTERATIONS

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

NEW ITEMS (WW)**GW9001 LANDORE JN TO SWANSEA****SWANSEA STATION, PLATFORM 4****BETWEEN 00:01 HOURS ON MONDAY 04 JANUARY 2021****UNTIL 23:59 HOURS ON FRIDAY 14 MAY 2021**

In connection with refurbishment of platform 4 at Swansea station, platform 4 line will be taken out of use.

A stop block chained to the rail adjacent to PT3174 signal complete with a red stop light will be provided to mark the limit of the work.

A vortok fence will be provided off platform 3 6ft line to mark the limit of work as platform 3 will be open to traffic whilst the work is undertaken apart from weekend possessions.

Please see amended Table A page in Section D of this notice

(C10847) (04/01/21) (43)

DETAILS OF WORK ALREADY CARRIED OUT (WW)**GW103 PADDINGTON TO UFFINGTON****OLD OAK COMMON WEST JUNCTION****FROM 05:00 HOURS ON SATURDAY 26 DECEMBER 2020**

Please note that from the above time and date the overhead line equipment over the following points have been switched off and recovered

- 8104 Down Relief to Up Relief
- 8106 Up Relief to Down Reception Line 1

(C11061) (26/12/20) (42)

OLD OAK COMMON HEATHROW EXPRESS DEPOT

From the above time and date and in association with the decommissioning of the Heathrow Express Depot, the overhead line equipment on the Western Access to the depot has been switched off and recovered.

Within the Depot, Hand Points 2 and 8 has been clipped and padlocked out of use in the reverse position.

(C11020) (14/12/20) (40)

WEST EALING

From the above time and date, SN6152 Limit of Shunt (LOS) signal, on the Down Relief (Up Direction) has been re-positioned 4 metres closer to Paddington on the **right-hand side** on approach, i.e. on the Down Relief platform at West Ealing station.

(C10864) (13/12/2020) (40)

WEST DRAYTON FRAYS SIDINGS

From the above date, please note that Frays Sidings and the adjoining Cripple Siding has been taken out of use to accommodate track renewal work.

(C11037) (15/12/20) (40)

GW105 UFFINGTON TO FORDGATE (VIA BOX)**BRISTOL TEMPLE MEADS – IN/OUT SIDING****FROM 04.00 HOURS ON MONDAY 28 DECEMBER 2020**

The In/Out Siding (former Bath Road depot connection), adjacent to Bristol Temple Meads platform 15, together with the associated signalling (including position-light signal BL6710), has been taken out of use and recovered.

See also Section D (Table A page and Local Instructions)

(C/5549 – C10867) (28/12/20) (42)

SECTION C – SIGNALLING AND PERMANENT WAY ALTERATIONS

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

NEW ITEMS - Continued

BETWEEN FEEDER BRIDGE JN AND BRISTOL EAST JN
FROM 04.00 HOURS ON MONDAY 28 DECEMBER 2020

Points 7102 (which form a trailing connection between the Down Main line and the former Kingsland Road sidings at the Bristol East Junction end) has been secured in the normal position.

Down Main line (up direction) position-light signal BL6686 (along the route between main running signals BL2078 and BL1982) will be taken out of use and recovered.

(C/5630 – C10987) (28/12/20) (42)

BETWEEN FEEDER BRIDGE JN AND BRISTOL EAST JN
KINGSLAND ROAD SIDINGS
FROM 04.00 HOURS ON MONDAY 28 DECEMBER 2020
TO 00.01 HOURS ON SATURDAY 4 SEPTEMBER 2021

Kingsland Road siding 8 (together with previously published sidings 3 and 5) has been taken out of use and replaced by a construction site accessed by engineering trains and On-Track Machines (OTM) only.

The construction site will be protected by sleepers secured across the rails (and a red light) at either end.

Access to the construction site will be via the London end of the site.

See also Section D (Table A page and Local Instructions)

GW180 HEATHROW AIRPORT JN TO HEATHROW TERMINALS 4 AND 5

HEATHROW STATIONS PLATFORMS

With effect from the above time and date, new platform stop markers have been provided at the following locations

Class 387 PSMs at Heathrow Central (Terminals 2 & 3)

New Platform Stop Marks for Class 387 trains were commissioned at Platforms 1 and 2 from the start of service on Monday 14th December 2020. The PSMs use a standard '8-Car' design with 'Cl. 387' underneath.

- **Platform 1 [Up Direction]** – The platform length is 195m. The stopping position is 185m from the Country end of the platform.
- **Platform 1 [Down Direction]** – The platform length is 195m. The stopping position is 190m from the London end of the platform.
- **Platform 2 [Up Direction]** – The platform length is 195m. The stopping position is 180m from the Country end of the platform.
- **Platform 2 [Down Direction]** – The platform length is 195m. The stopping position is 185m from the London end of the platform.

Class 387 PSM at Heathrow Terminal 5

New Platform Stop Marks for Class 387 were commissioned at Platforms 3 and 4 from the start of service on Monday 14th December 2020. The PSMs use a standard '8-Car' design with 'Cl. 387' underneath.

- **Platform 3** – The platform length is 217m. The stopping position is 210m from the London end of the platform.
- **Platform 4** – The platform length is 217m. The stopping position is 200m from the London end of the platform.

(C11026) (19/12/20) (41)

GW450 STOKE GIFFORD JN TO BRISTOL EAST JN

LAWRENCE HILL

Please note that from the above time and date, Up Filton Relief signal BL1810 located at 1m 10ch, has been renewed as a single aperture LED ILS signal capable of displaying 3 aspects.

The position of the signal post telephone will not be affected by this work.

(C11024) (20/12/20) (41)

GW700 GLOUCESTER BARNWOOD JN TO SEVERN TUNNEL JN

BETWEEN OVER JN AND GLOUCESTER WEST JN
FROM SATURDAY 26 DECEMBER 2020

Please note that from the above date, Up Main signal G31 located at 114m 55ch has been renewed as a double aperture LED type signal capable of displaying four aspects.

The associated position 1, 2, 4 and 5 junction indicators, the position light signal and stencil indicator have also been renewed as LED types.

(C10988) (26/12/20) (42)

SECTION C – SIGNALLING AND PERMANENT WAY ALTERATIONS

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

NEW ITEMS - Continued**GW910 – CRAVEN ARMS JN TO LLANDEILO JN****LLANDRINDOD WELLS TMO CROSSING**

Following the renewal of the Trainman Operating Barriers at Llandrindod TMO.

The cab pull wire associated with the Down Direction Stop Board approaching the level crossing, along with the crossing control unit at the Stop Board has been renewed in its current location. The Stop Board has also been renewed with no change wording/ height/size at the same location.

The Down Direction Barrier Up Indicator located at 31m 55ch will be recovered.

The cab pull wire associated with the Up Direction Stop Board approaching the level crossing, along with the crossing control unit at the Stop Board will be renewed in its current location. The Stop Board will also be renewed with no change wording/ height/size at the same location.

The Up-Direction Barrier Up Indicator located at 31m 14ch will be recovered.

The Up Direction 30/45 MU55 PSR Sign approaching the level crossing will be relocated to 31m 58ch, to be parallel with the Down Direction Stop Board.

Please see amended Table A page in Section D of this notice

(C10861) (14/12/2020) (40)

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

**** Items marked thus will not appear in future issues and a note must be taken of them by all concerned**
A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS (WW)

RULE BOOK AMENDMENTS

RULE BOOK AMENDMENTS FROM 00:01 HOURS ON SATURDAY 05 DECEMBER 2020**New section for inclusion in GERT8000 – TS1****13.2 COSS, IWA, PC or SWL blocking a line****13.2.2 Agreeing the Arrangements**

You must agree with the COSS, IWA, PC or SWL:

- the line to be blocked
- the nature of the work
- the locations between which the work will take place
- the amount of time needed to do the work
- the time after which permission can be given for the line blockage to start
- which signals or block markers will protect the activity, including those in both directions on a single or bi-directional line
- any additional protection needed if the work will affect the safety of the line
- the arrangements if single line working is taking place
- the arrangements at any level crossings affected by the line blockage.

If the location of the work will be beyond any points or crossover, you may set the route for an unaffected line as long as you have agreed this with the COSS, IWA, PC or SWL. See [diagram TS1.2](#) on page 45 and [diagram TS1.3](#) on page 46.

If the site of the work will be less than 200 metres from the protecting signal or block marker, and the work will affect the safety of the line, the COSS, IWA, PC or SWL will tell you and you must also keep the previous signal at danger or the route closed at the previous block marker unless the route can be set for an unaffected line. See diagram TS1.4 on page 47 and diagram TS1.5 on page 48.

If this signal or block marker is controlled by another signaller, you must get confirmation from that signaller that this has been done.

If you have told the COSS, IWA, PC or SWL, you can allow the signal to be passed at danger or the EoA to be passed without an MA so that a train can reach a:

- station
- siding
- crossover being used for single line working.

See diagram TS1.6 on page 49 and diagram TS1.7 on page 50.

route closed at the previous block marker unless the route can be set for an unaffected line. See diagram TS1.4 on page 47 and diagram TS1.5 on page 48.

If this signal or block marker is controlled by another signaller, you must get confirmation from that signaller that this has been done.

If you have told the COSS, IWA, PC or SWL, you can allow the signal to be passed at danger or the EoA to be passed without an MA so that a train can reach a:

- station
- siding
- crossover being used for single line working.

See diagram TS1.6 on page 49 and diagram TS1.7 on page 50.

If the work will affect the operation of any level crossing, you must carry out the regulations in module TS9 Level crossings - signallers' regulations.

If any crossing keepers will be affected by the protection arrangements or the work, you must tell them.

MODULE WR2 – LOCAL INSTRUCTIONS**Hard copy Sectional Appendix page 556****Rule Book Module:** GW105 – UFFINGTON TO FORDGATE VIA BOX – BRISTOL TEMPLE MEADS**Remove:** Remove the following section

In/Out Road siding (adjacent to platform 15)

The driver must get permission from the signaller to make any movement towards position-light signal BL6710.

(D/4377 - D17358) (28/12/2020) (42)

Hard copy Sectional Appendix page 588**Rule Book Module:** GW317 – HONEYBOURNE TO LONG MARSTON – HONEYBOURNE AND LONG MARSTON GF**Amend:** Add additional information to the instructionPrinciples of Operation - General

The line from Honeybourne to Long Marston is signalled under 'One Train Working' regulations.

The train staff is located at Honeybourne and issued under the authority of the Signaller at Evesham. The normal direction of traffic is for trains to travel from Honeybourne to Long Marston and return.

Once the train staff has been issued, the train must proceed towards the opposite end of the single line. Trains may only return to the place where they entered the single line with authority from the Evesham Signaller.

The train staff may be issued for protection purposes under line blockage and T3 possession regulations.

Honeybourne. Trains to or from Honeybourne Up Yard or the Long Marston branch that are required to reverse on the main lines must be capable of being driven from both ends. If this is not possible, a locomotive must be provided at either end and propelling is not permitted.Long Marston branch. A train staff is provided and is kept in a locked staff hut at Honeybourne. The Train Operating Company Person in Charge (PIC) must obtain permission from the signaller at Evesham to obtain and return the train staff.

Item continued on the next page

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned

A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NETWORK RAIL WESTERN ROUTE SECTIONAL APPENDIX DATED APRIL 2009****MODULE WR2 – LOCAL INSTRUCTIONS Continued**

A 'Start of Staff section' board, applicable to trains for the Long Marston direction and an 'End of Staff section' board, applicable to trains from the Long Marston direction are provided at Honeybourne at 101m 43ch.

The train staff must be obtained for any movement beyond the 'Start of Staff section' board.

Trains from the Long Marston direction must be stopped at the 'End of Staff section' board, and the train staff returned to the hut which must then be locked. The PiC must obtain permission from the signaller at Evesham to pass this board and proceed towards position light signal E2443.

Long Marston. The PiC must advise the signaller at Evesham using the direct telephone line when a train has arrived clear of the single line complete with tail lamp at Long Marston. The PiC must also obtain permission from the signaller using the direct telephone line to enter the single line section and return towards Honeybourne.

Trains may enter the single line at Long Marston without having travelled from Honeybourne provided the train staff has either travelled by a train from Honeybourne and is present or has been transport by road with the permission of the Evesham Signaller.

Ground frame and MOD Sidings. The normal position of the ground frame points is for movements along the sidings. The key to the ground frame is the Annett's key fixed at one end of the train staff.

The PiC must ensure that the points are secured in the normal position after use. No movement must pass the 'STOP' board at the ground frame applicable to trains from the Honeybourne direction, neither must the ground frame points be released until the PiC has :

- opened the terminal gate, and
- checked that no other conflicting movements are taking place.

Movements within the depot will be made under the supervision of the depot staff.

Transfer of train staff by road

If a train is required to enter the single line at Long Marston the train staff may be issued by the Evesham Signaller for transfer by road. The Signaller will require details of:

- Person who will be responsible for the token
- Employer
- Mobile phone contact number
- Estimated length of time train staff will be in transit

Upon arrival at Long Marston contact must be made immediately with the Evesham Signaller confirming the location of the train staff.

Trains departing Long Marston will follow the relevant instructions above.

(D17533) (12/12/2020) (40)

Hard copy Sectional Appendix page 588

Rule Book Module: GW608 - CREDITON TO COLEFORD (MELDON LINE)

Amend: Add additional information to the instruction

Entire Line Of Route**Arriving and departing train – other end of the single line**

The driver must tell the Crediton Signaller when the train arrives and obtain permission to return from former Coleford Junction (183m 79ch – end of line) to Crediton

Note: When the scheduled turn round time is less than 5 minutes, only one telephone/train radio call is necessary on arrival.

(D17535) (12/12/2020) (40)

Llandrindod Level Crossing (TMO)

Amend Replace current instruction with the below new instructionDrivers operating instructions for LLANDRINDOD Trainman operated barriersNormal Operation

Lowering of the barriers is controlled by a pull-wire provided at driving cab height on the nearside of the line, 5 metres from the stop board. The Driver must stop the train at the control wire and must pull the control wire to close the crossing to road traffic. The Driver must observe the crossing while the barriers are lowering to ensure that nothing is trapped under or between the barriers. A second pull of the pull wire will stop the barriers lowering. To resume the lowering sequence the control wire must be pulled again. A cupboard (opened by a BR 1 key) is provided at ground level, containing a control unit with a "Lower" push button.

When the barriers are correctly lowered, the white light on the "Stop" board will flash. As the barriers are designed to rise automatically following the passage of the train, the train may proceed on its journey.

Failure of equipment:

The Signaller at Pantyffynnon Signal box must be advised of the failure of any equipment at the level crossing and the following procedure must be adopted until the failure is rectified.

1. Failure of white light on the Stop board:
If the white light on the stop board fails to flash, the train may proceed over the crossing provided the driver is satisfied that the barriers are fully lowered.
2. Failure of barriers to lower:
If the barriers fail to lower, but the road traffic signals are operating the train may pass over the crossing provided the driver is satisfied it is safe to do so.
3. Failure of barriers and Red Road Traffic signals:
In the event of failure of the barriers and Red Road Traffic signals, the train may proceed over the crossing provided the driver is satisfied it is safe to do so.
4. Failure of cab height pull-wire:
A cupboard (opened by a BR 1 key) is provided at ground level, containing a control unit with a "Lower" push button. If the pull wire operation fails to lower the barriers the train Driver must go to the control unit and press "Lower" button. The "Lower" button must be kept pressed until the barriers are lowered and "Barriers Down" indication is lit. If it is necessary to stop the barriers in the middle of lowering sequence, the "Lower" button must be released.
If this attempt to lower the barriers also fails, instructions 2 or 3 above must apply.

Drivers must observe extreme caution when proceeding over the crossing during failure of equipment.

If a train does not proceed over the crossing within **3** minutes of initiating Lower sequence, either by pulling the cab wire or by pressing the Lower button, the Driver's White light, if lit, will be extinguished and 30 seconds thereafter the barriers will rise. Drivers are required to wait till the barriers have raised completely. In this instance, subsequent attempts to initiate the crossing sequence will not lower the barriers until attended by NR staff. Drivers must inform the Signaller at Pantyffynnon Signal Box and follow instruction 3 above.

(D17530) (12/12/2020) (40)

Hard copy Sectional Appendix page 689**Rule Book Module:** GW910 CRAVEN ARMS JN TO LLADEILLO JN

Llandovery Level Crossing (TMO)

Amend The local instruction to show the below changes.

Drivers operating instructions for LLANDOVERY Trainman Operated Barriers (TMO)

Normal OperationDown Trains:

Lowering of the barriers is controlled by a pull-wire provided at driving cab height on the nearside of the line, 5 metres from the stop board. The Driver must stop the train at the control wire and must pull the control wire to close the crossing to road traffic. The Driver must observe the crossing while the barriers are lowering to ensure that nothing is trapped under or between the barriers. A second pull of the pull wire will stop the barriers lowering. To resume the lowering sequence the control

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NETWORK RAIL WESTERN ROUTE SECTIONAL APPENDIX DATED APRIL 2009****MODULE WR2 – LOCAL INSTRUCTIONS Continued**

wire must be pulled again. A cupboard (opened by a BR 1 key) is provided at ground level, containing a control unit with a “Lower” push button.

When the barriers are correctly lowered, the white light on the “Stop” board will flash. As the barriers are designed to rise automatically following the passage of the train, the train may proceed on its journey.

Up Trains:**Obtain Key Token for the section before attempting to lower the barriers**

A cupboard (opened by a BR 1 key) is provided on the approach to the level crossing, containing a control unit with a “Lower” push button. On arrival of a train at the “Stop” board, the Guard/Driver must unlock the cupboard and press and hold the “Lower” button. When the button has been pressed, the “Up” indicator will be extinguished, showing that the barrier lowering sequence has commenced and the road traffic signals will commence to operate.

A red indicator light will be lit to show that the road traffic signals are operating on both approaches to the crossing. The “Lower” button must not be released until the barrier lowering sequence has been completed. The operator must observe the crossing whilst the barriers are lowering to ensure that nothing is trapped under or between the barriers.

If it is necessary to stop the barriers descending, the “Lower” button must be released. Further operation of the “Lower” button will continue the lowering sequence. When all barriers are fully lowered, the “Down” indicator will illuminate.

When the barriers are correctly lowered, a Barriers Down indicator will be lit and an indicator repeating the white light on the “Stop” board will be lit. The operator must then RELOCK THE CUPBOARD and re-join the train. As the barriers are designed to rise automatically following the passage of the train, the train may proceed on its journey observing the flashing white light on the Stop board.

Failure of equipment:

The Signaller at Pantyffynnon Signal box must be advised of the failure of any equipment at the level crossing and the following procedure must be adopted until the failure is rectified.

1. Failure of white light on the Stop board:

If the white light on the stop board fails to flash, the train may proceed over the crossing provided the driver is in possession of the Key Token for the Section and is satisfied that the barriers are fully lowered. You must operate the Temporary TPWS rain Stop override Button before passing the Stop board

2. Failure of barriers to lower:

If the barriers fail to lower, but the road traffic signals are operating the train may pass over

the crossing provided the driver is in possession of the Key Token and is satisfied it is safe to do so. You must operate the Temporary TPWS rain Stop override Button before passing the Stop board

3. Failure of barriers and Red Road Traffic signals:

In the event of failure of the barriers and Red Road Traffic signals, the train may proceed over the crossing provided the driver is in possession of the Key Token and is satisfied it is safe to do so. You must operate the Temporary TPWS rain Stop override Button before passing the Stop board

4. Failure of cab height pull-wire (Down trains):

A cupboard (opened by a BR 1 key) is provided at ground level, containing a control unit with

a “Lower” push button. If the pull wire operation fails to lower the barriers the train Driver must go to the control unit and press “Lower” button. The “Lower” button must be kept pressed until the barriers are lowered and “Barriers Down” indication is lit. If it is necessary to stop the barriers in the middle of lowering sequence, the “Lower” button must be released.

If this attempt to lower the barriers also fails, instructions 2 or 3 above must apply.

Drivers must observe extreme caution when proceeding over the crossing during failure of equipment.

The white light on the “Stop” board will only flash when the control unit/Cab wire at that board has been used.

Item continued on next page

SECTION D – GENERAL INSTRUCTIONS AND NOTICES

** Items marked thus will not appear in future issues and a note must be taken of them by all concerned
A thick vertical line denotes new or amended items

AMENDMENTS TO OPERATING PUBLICATIONS – Continued**NETWORK RAIL WESTERN ROUTE SECTIONAL APPENDIX DATED APRIL 2009****MODULE WR2 – LOCAL INSTRUCTIONS Continued**

When a Down train has crossed an Up train, the Guard/Driver of the Up train must always wait until the barrier raising sequence has been fully completed after the passage of a down train before operating the control unit to lower them again.

If a train does not proceed over the crossing within 7 minutes of initiating Lower sequence, either by pulling the cab wire or by pressing the Lower button, the Driver's White light, if lit, will be extinguished and 30 seconds thereafter the barriers will rise. Drivers are required to wait till the barriers have raised completely. In this instance, subsequent attempts to initiate the crossing sequence will not lower the barriers until attended by NR staff. Drivers must inform the Signaller at Pantyffynnon Signal Box and follow instruction 3 above.

BRISTOL TEMPLE MEADS
WITH IMMEDIATE EFFECT UNTIL FRIDAY 30TH SEPTEMBER 2022

In association with the refurbishment of the roof at Bristol Temple Meads, the Motorail siding (adjacent to platform 2) This has been shortened by 95 metres, which will leave an operational length of 90 metres. The temporary length will be in place for the duration of the works, to allow staff a safe walking route to and from the station.

A standard buffer stop with no light, will be provided to protect the shortened Motorail siding.

This is in connection with Short Term Network Change ref STNC/G1/2019/WEST/669.

This was previously published in Western & Wales WON Week 52 (19/20)

(D17515) (05/12/2020) (27/2022)

GW110 OLD OAK COMMON WEST JN TO SOUTH RUISLIP JN (EXCL)

OLD OAK COMMON WEST JUNCTION
FROM 2300 HOURS SUNDAY 24 FEBRUARY 2019

**** Until Further Notice ****

From the above time and date, 8108 A and B points will be plain lined. A track panel will be removed at either end of the closed section of the Wycombe Single and the remaining track will be recovered later.

Down direction signal SN401 will remain, but the rest of the signalling on the Wycombe Single line will be recovered.

A temporary stop block fitted with a red lamp will be provided at 3m 49chs.

(D16989) (11/07/2020) (52)

GW185 MAIDENHEAD TO MARLOW
BETWEEN MAIDENHEAD AND MARLOW
WITH IMMEDIATE EFFECT

Please note that the additional whistle boards provided at the following crossings are still in use and drivers should continue to sound both the high and low tones on the horn, until advised otherwise.

These additional boards will remain on site until the crossing is fitted with miniature stop lights. When this happens, this will be published in the relevant WON.

- Spade Oak at 0m 58ch
- Vineyard 2 at 1m 08ch
- Ivory Field at 1m 76ch

(D17433) (19/12/20) (41)

GW200 DIDCOT TO HEYFORD
HINKSEY
UNTIL SATURDAY 27 MARCH 2021

The following area around Hinksey Depot, ELR=DCL 62m 03ch / LOR=GW200 has encountered a reduction in radio coverage with the GSM-R system which may result in registration problems and hinder the ability of the driver to contact the signaller. This will be presented to the Driver on the DCP as 'Searching for network'. The radio should recover when the train has moved out of the affected area. If this location is at the start of a journey then the driver should carry out the 'Pending Registration' process on the radio and continue their journey. Details on this are provided in the GSM-R Driver User Procedures which should be issued to all drivers but are also readily available from the RSSB website. Mitigation Measures are in process with an estimated completion October 2021.

(D17370) (14/11/2020) (52)

PUBLICATION MANAGER

IMPORTANT GUIDELINES FOR SUBMITTING SAFETY, 'C' OR 'D' ITEMS

All submissions must be made using Section C and/or D electronic forms from this link www.railnotices.net. All submissions must be made 19 days before the start date.

If items are received for inclusion in specific WONs after the 'submitted by' date they will be deemed to have missed the publication deadline for the WON they were submitted for. It is the responsibility of the 'proposer' to ensure that all required information is provided with the submission. Network Rail's Publications Manager reserves the right to refuse any late, inaccurate or incomplete submission.

Any queries relating to submissions or you require a copy of the Submission Guidelines please e-mail PlanningPublications@networkrail.co.uk.

This Publication is produced by:

Planning Publications at Network Rail, The Quadrant:MK,
Elder Gate, Milton Keynes, MK9 1EN

Email: PlanningPublications@networkrail.co.uk.

***** ATTENTION *****

Would you like to receive this publication electronically via e-mail instead of a printed copy, receive it earlier and become friendlier to the environment?

Are there any Sections that you do not require and can be omitted from this Bespoke WON?

Do you receive additional printed copies that are not required?

If your answer to any of the above questions is YES, please contact us at PlanningPublications@networkrail.co.uk with the details.

Printer Details

This publication is supplied by Office Depot. If this publication is not received by 1500 hours Thursday (or if you have any printing or distribution issues), please contact The Office Depot Helpdesk (8am-6pm) 020 8269 3735 or email: NRPublications.helpdesk@officedepot.eu.

Out of hours (6pm-8am) 01793 432 913.

An electronic copy is a more efficient and speedier way to receive any publication and especially during adverse weather condition when this may be the only option to receive it.

Section C&D and Safety Notices

For queries regarding the content of sections C&D and Safety Notices of this publication contact Planning Publications Team at: PlanningPublications@networkrail.co.uk.

Electronic Storage for Network Rail Users Only

Electronic Copies of all WON's are available from our shared drive <V:\MK\NC1FG03-GGroups\Planning Publications\Publications>
